About

Available packages

Releases of the Java Open Application Server (JOnAS) are also available from the [OW2 Forge file repository page](#). The latest JOnAS milestone build (latest tagged version) can also be downloaded; be careful, this version may be unstable and should not be used for real applications. Note that the [SVN](#) version is needed to get the latest current development release.

Nightly builds

JOnAS nightly builds are available from the [OW2 Maven repository](#). [>>Archives Downloads available](#) (en)
